

### Course rationale: Foundation ESOL

This course is designed to meet the English language learning needs of students who are working at foundation and stage one levels of *The English Language Learning Progressions* (ELLP) & *The English Language Intensive Programme* (ELIP).

Some of the students are from refugee backgrounds and require a focus on orientation to learning (ELIP, Foundation 1a). They may not be literate in L1 and may have had little or no previous formal education. These students will need additional support and a focus on pre-reading & pre-writing skills and early numeracy skills. The Focus on English series has been used because the booklets enable teachers to provide teaching and learning for a small group of students with teacher aide or bilingual support.

Some students will be literate in L1 and stronger in oral skills. These students will need a strong foundation in written and oral language skills to prepare them for integration to mainstream subjects.

The aim of the course is to help students move, when they are ready, into a limited range of mainstream subjects, beginning with Maths and PE. Topics have been chosen to aid this transition to mainstream subjects.

**Opportunities for multi-leveiling:** Students in the class who are at a higher level than foundation e.g. ELLP stage one, could be assessed with ESOL level one unit standards. See the differentiation column in the course outline.
