

Teacher Notes

Predict and Check Template

Students work in pairs

The teacher copies and distributes the template so that every pair of students receives a piece of paper. [Its best done where half the number of templates printed on white paper and the other half on another colour]

In pairs, the students decide on the best meaning for the words on the Predict and Check template.

Students then record their definition on the template.

WORD	MEANING	WORD
sound		
frequency		

WORD	MEANING	WORD
sound		
frequency		

Students fold back the scientific word column (on the left hand side) and then exchange their Predict and Check sheet with another Predict and Check sheet of a different colour.

Students read the given meaning and work together to decide on the correct scientific word which is recorded on the right hand side.

Students then fold back the left hand side of the Predict and Check sheet and see if their scientific word matches.

Differentiating to meet students' needs.

- ✍ English Language Learners able to use their first language for names equivalent to the English words and
 - ✓ match them to the English word
 - ✓ teach others the word in their first language
 - ✓ record the word in their first language and in English
 - ✓ teach other students the word in their first language
